

GRAMSABHA to LOKSABHA Endorsement Campaign

GRAMSABHA APPROVAL LETTER

In context of support for the movement for black money, corruption and system change

1. I agree to the seven processes of Bharat Swabhiman Movement's aim to bring back black money and see that black money doesn't accumulate in the future and also the three ways to get rid of corruption and the six main points for changing the system.
2. The wealth that enters into the country in the name of FDI also contains black money. We believe that the entire investment that enters into the country in the name of FDI is not all black money. Therefore we approve of that investment which is not suspicious.

But now, no information is let out about the main source of investment that comes through FDI and the company's real share-holders. Only the information about the directors and managers is available and often these are not the real owners of those companies. The wealth through FDI, to know whether it is black or white, the government should immediately make a legal provision to know about the details of its main source and the full details of its real owners. From this, first hand details about most of the people who hoard black money can be found and also apart from their involvement in FDI, details regarding their illegal wealth and illegal holdings - gold, mining, land and infrastructure, drugs black-marketing, renege etc will be known. Also information regarding the huge amount of black-money that is stashed abroad and inside the country in areas like politics, health, education etc can also be known easily and the route to bring back the black-money into the economy will be opened. Alongside, transparency will enter into the economy. FDI is the key or central-point of black money. From this, the secrets / mysteries regarding the black money in the country and abroad will be revealed / unfolded.

3. Once black money flows back into the economy of the country, then every Gram-Sabha / Gram-Panchayat will receive directly or indirectly 100 to 200 crores of rupees for development. From this farmers fields' will get full water and electricity supply and all the basic amenities and services can become easily accessible. Global standard schools, colleges and universities can be built for the village children. Unemployed youth can gain employment. Dalits, Valmiki, forest tribes and poor - hindu, muslim, sikh, christian etc people belonging to any caste, creed or religion will not be poor and down-trodden. Bharat's economy will be strengthened.

In all the areas, GDP and growth rate will increase. Exports will increase. Rupee devaluation will not happen. The pride and honor of Bharat will increase in the world. Our defense will be strengthened. Because the most important and strong point of any country is its economy. Entire country runs alongside the economy. We have taken lot of internal and external debts. Even from tax-money, capital for the basic development of the country is not available. So now, the only solution is to obtain the black-money. Bharat will once again become the Golden Bird, once the black-money returns into the economy. We will be the Super-Power in place of USA or China. Shining India Vs Burning India, i.e. the differences of rich and poor will be wiped off.

This country belongs not only to the central government, parliamentarians and political parties, but also to us citizens or the public. Therefore, today when the country is passing through a serious economic crisis, poverty, inflation and other social adversities and problems, its the duty of us villagers and Bharatiyas to work to bring back around 400 lakh crores of rupees of black money into the economy of the country; for the development, prosperity and happiness of the country. We have to fight unitedly and raise our voice in unison and support this campaign in the interest of the nation.

In a democracy people are of highest importance. When around 2 lakh 39thousand 867 GramSabhas; 6lakh 38thousand 365 villages; 121 crores of population, all honest parliamentarians and political parties are united to get back black money into the country, then the central government ought to take immediate measures based on the seven processes suggested by BharatSwabhiman to get back black money.
